

1. GAME OVERVIEW

- Objective: Build the highest-scoring family tree over three rounds.
- Players / Time: 2-6 players; about 20-30 minutes; light complexity.
- Win: Score wealth and dynasties each round, then marriages after Round 3. Highest score wins.

2. SETUP CHRONOLOGY

- A. Give each player one Scoreboard.
- B. Shuffle all 110 Ancestor tiles face down into a shared pile or box lid.
- C. Leave a large open area before each player for a growing family tree.
- D. Sort 96 Dynasty tokens into values I, II, and III.
- E. Place 110 Gold tokens nearby in values 1, 5, and 10.
- F. At the start of each round, every player draws six tiles.
- G. Keep hands hidden; choose and reveal simultaneously.
- H. Pass left in Rounds 1 and 3; pass right in Round 2.

COMPONENT LEGEND

Tiles = ancestors | I/II/III = dynasty awards
Gold tokens = scored coin icons

3. STRUCTURE OF A ROUND

- 1 CHOOSE

Select one tile; place it face down.

↓
- 2 PASS

Pass remaining tiles in the round direction.

↓
- 3 REVEAL

Everyone reveals simultaneously.

↓
- 4 BUILD

Place by a valid Leaf or Heart connection.

↓
- 5 REPEAT

Continue until five tiles are placed.

↓
- 6 DISCARD

Discard the sixth tile.

↓
- 7 SCORE

Score dynasties and visible coins.

4. COMPONENTS + TABLE SETUP

Shared tile supply, Scoreboards, Dynasty tokens, Gold tokens, and open player areas

1. KEY MECHANICS

- Each tile shows a heritage, Leaf connectors, Heart halves, and sometimes coins.
- First tile may be placed freely. Every later tile must connect to the existing tree.
- Parent / child: matching half-Leaves connect vertically.
- Marriage: two half-Hearts meet horizontally to form one complete heart.
- Once placed, a tile cannot move for the rest of the game.
- An unplaceable chosen tile is discarded and does not score.
- After five placements, discard the last tile and score the round.

FREQUENTLY FORGOTTEN

- Round 2 passes right; Rounds 1 and 3 pass left.
- Coins pay again after every round while visible in the tree.
- Dynasties compare only against immediate neighbors.
- A tied dynasty is not strictly longer, so it earns no win against that neighbor.
- Marriages score only once, after Round 3.

2. SCORING SUMMARY

END OF EACH ROUND

- Dynasties: For each of the five heritage colors, find your longest unbroken generation line. Compare separately with the neighbor on each side.
- Gain a Dynasty token for each adjacent neighbor whose line is shorter: I in Round 1, II in Round 2, III in Round 3.
- Wealth: Gain 1 Gold for every visible coin icon in your family tree.

R1	R2	R3
I = 1 point(s)	II = 2 point(s)	III = 3 point(s)

END GAME: MARRIAGE BONUS

Score completed hearts using the marriage track:
1/2/3/4/5/6/7/8 = 1/3/6/10/15/21/25/30
9 or more marriages = 35 points.

4. END OF GAME

- Finish the third round and score dynasties and coins.
- Count completed marriages and add the matching bonus.
- Add all Gold and Dynasty token values.
- Highest score wins. For a tie, consult the official rulebook for the edition in play.

3. STRATEGIC TIPS

GOOD HABITS

- Prioritize early coin tiles because they can score in all three rounds.
- Preserve several open Leaf and Heart edges.
- Track both adjacent players before committing to a dynasty color.

COMMON MISTAKES

- Do not rotate or relocate tiles after placement.
- Do not count a tie as a dynasty win.
- Avoid choosing a tile that cannot connect legally.

COMPETITIVE TIPS

- Round 3 dynasty wins are the most valuable.
- Draft a key tile defensively when a neighbor threatens a long generation line.
- Heart-heavy bridge tiles can push the marriage bonus into a higher tier.
- Balance two strong dynasties with coins and marriages rather than chasing every color.
